

whatever be your product

our belts will

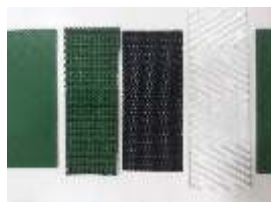

make it **move**

FDA approved belts

DERCO belts are FDA approved and used extensively for unwrapped food conveying

Pattern Belts

> 20 types of patterns on top / bottom surface i.e. Inverted Diamond, Super Grip, Basket Weave etc.

Belts with Flights / Sidewall

Special belts with various flights & sidewalls for inclined conveying with zero spillage

Treadmill Belts

Special treadmill belts that are noise-free, and antistatic

Knife-edge Belts

Knife-edge belts for small radius transfers

Curved Belts

Specially designed belts for smooth operation on curved conveyors

Printing Blankets

Printing Blankets for flat screen, rotary and digital printing machines

Emery Rolls

Wide-range of Lagging materials for Roller Covering in Textile / Process Industry

Range of Joints

Expert in-house facility of hot-spliced finger joint, Unibar Fastener joint and RS 62 fastener joint

Finger joint

Unibar Fastener joint

RS 62 Fastener joint

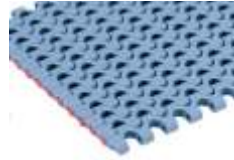

Movex[®]

MOVEX (Italy) make Modular Belts, Slat Chains & Conveyor components for various industries, especially beverages, food, packaging, automotive applications.

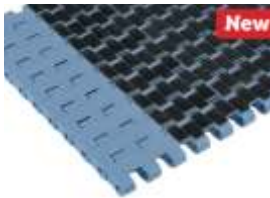

Movex products are available in various constructions like Solid / Perforated / Rubber / Roller Top, PP/PE/POM materials, straight/curved and various pitch modules. Movex also provides a range of conveyor components – sprockets, Flights, Wear Strips, Side Guards, Tracking Guides etc.

Flat Top Belts

Flush Grid /
Perforated Top

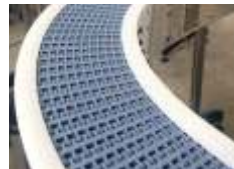

Rubber top
(with / without
side indent)

Low-Back
Pressure Belts

Raised Rib
(with comb /
finger-plate)

Curved /
90 degree turn

Zero
contact
An innovative product,
with links of variable
pitch, thereby eliminating
gaps in curving conveyor

Side-flexing
Belt

Low-Back
Pressure Chains

Spiral Chain
Conveyor

MODULAR BELTS & SLAT CHAINS

Table Top Chains (Steel)

Table Top Chains (Plastic)

Side-flexing Chains (Steel/Plastic)

Gripper Chains

Rubber Top Chains

Components & Accessories

Entire range of conveyor components and accessories including sprockets, guides, profiles, return components, bearing supports, conveyor supports, brackets, levelling pads etc.

MODUTECH[®]

MODUTECH (Turkey) make Modular Belts & Chains for various applications in food, fruit, vegetables & dairy industries. Available in PE / PP and POM materials. FDA approved for direct food contact

Modular Belt with optional cleats / sidewalls for various applications

Open surface belts for cooling & cleaning

BRECO (Germany) is the World-leader in PU Timing Belts reinforced with Steel / Kevlar cord.

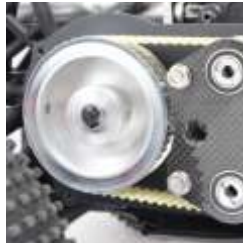

BRECOFLEX (Germany)

PU Timing Belts are innovatively manufactured as truly endless (tension member is spirally coiled without any joint)

BRECO Timing Belts

BRECO PU Timing belts are available in open lengths for linear transmission & with V Joint for conveying application

BRECOFLEX Timing Belts

BRECOFLEX truly endless belts offer the advantage of greater precision, high-speed capability, improved flexibility, and enhanced pitch stability.

BRECO ATN

BRECO ATN is an innovative timing belt design for use as a variable conveyor system offering flexible and precise profile positioning

CONTITECH Germany: Globally renowned leader in rubber Timing Belts, Poly-V Belts, & Vari-speed Belts. Offers a wide range of metric / trapezoidal profiles to cover all drive applications

RUBBER TIMING BELTS

Enable economic drive solutions. Metric / T trapezoidal profiles cover all drive applications.

CONTI SYCHROCHAIN

Special timing belts developed for use in high-torque and extreme - environment applications

CONTI[®] SYNCHROFLEX GEN III

SYNCHROFLEX Timing Belts offer high power transmission capacity due to wear resistant PU & high grade steel cord.

Specially Coated Timing Belts

Timing Belts coated with application relevant coating: polymer / rubber / leather

Timing Pulleys

Timing Pulleys are hobbled from imported matching hobs which delivers pitch uniformity & precise tooth profile

REOCLEAN (Germany) provides conveying solutions that offer maximum hygiene, efficiency and precision in food processing

Positive Drive Homogenous Belts

REOCLEAN (Germany) homogenous thermoplastic (TPU) belts are highly recommended for food industries such as cheese, fruit & vegetables, poultry and meat

VOLTA (Israel) special technology belts range includes positive drive flat conveyor belts and non-fraying, homogenous, food-grade conveyor belts

VOLTA SuperDrive™

VOLTA SuperDrive™ is an innovative positive drive belt - considered state of the art for hygiene, quick sanitation and savings in the cost of ownership

Round & V Profile PU belts
VOLTA offers Round and V profile PU belts. Special round / V belts for canning lines and ESD belts for use in the electronics industry.

DAMON range of conveyor rollers including gravity rollers, drive rollers, accumulation rollers and break rollers

Teflon Belts

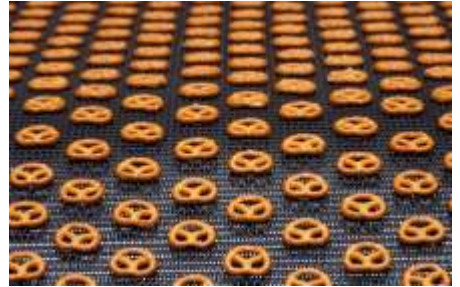

Teflon Belts for high temperature applications in food, textiles, heat-sealing, printing etc.

Wire Mesh Belts

Metallic mesh belts of SS 304 / High Carbon / GI wires with & without chains. Easy to clean and heat & chemical resistant, wire mesh belt is ideal for applications from metal-working to food and cleanroom medical
